WELCOME

TO THE WORLD OF FERMOB GROUP

Born in the workshop of a blacksmith in Ain, France, the company took a new direction when Bernard Reybier took over in 1989. It gradually evolved into an international group of brands, driven by a strong commitment to innovation and craftsmanship.

BY FERMOB

TEAK

60 YEARS *OF EXPERTISE*

HERITAGE
KNOW-HOW

PROFESSIONNAL
EXPERTISE

TEXTILE **EXPERTISE**

MAKE A LASTING IMPRESSION,

LEAVE A MINIMAL FOOTPRINT.

Designed for use in natural settings, all of Fermob's products are made using materials and processes that limit their environmental impact as much as possible. Fermob's design and aesthetic choices have always taken essential environmental priorities into account. From the design stage to the end of the product's life, Fermob is committed to addressing environmental issues. The CSR commitments adopted for over 35 years by Fermob are assets and strong selling points for our customers, as they represent a genuine competitive advantage.

ECO-DESIGN

METAL, A RESPONSIBLE CHOICE

Our two main materials – steel and aluminum – **are 98% recyclable materials**, and are processed through some of the most established recycling systems in the world.

PAINTS THAT PROTECT THE ENVIRONMENT AND HEALTH

The powder coatings used by Fermob are **solvent free and recyclable**. They are applied in a **zero-waste system**, with a series of baths guaranteeing outdoor use.

Zero Water Pollution:
Measured to balance the successive baths in the surface treatment tunnel.

Zero air emissions:
Furnace exhaust heat is captured and repurposed to heat our metal treatment baths.

Zero powder waste:
We use 100% solvent-free, waterless polyester powder coatings applied in a closed circuit. Unused powder is vacuumed and recycled directly back into the system

Because Fermob's manufacturing facilities are environmentally certified **Installation Classified for the Protection of the Environment** (ICPE), the company maintains strict sustainability standards as a responsible manufacturer. This **commitment** is further demonstrated by its participation in a program monitoring hazardous water discharges (RSDE).

REDUCING ENVIRONMENTAL IMPACT: AN ONGOING FOCUS

Optimizing energy consumption and conserving water resources are top priorities for Fermob, as demonstrated by our ongoing **practical initiatives:**

- **Lowering the temperature** used for our heating processes (-50 °F compared to 1998),
- Installation of a **drying system with reduced consumption** (-10%),
- Investment in a **painting line**, which will save eight tonnes of powder per year,
- **Reduction in our water consumption** (-43% between 2015 and 2021),
- **Reduction in our electricity consumption** with the integration of **LED lighting** since 2012.

INTERNAL INDICATORS TO PROMOTE THE REPAIRABILITY & RECYCLABILITY OF OUR PRODUCTS

To demonstrate its commitment to creating long-lasting products, the Group has developed two additional indexes that are specific to Fermob:

- **The IREP repairability index**
- **The IRCY recyclability index**

These indexes, which have been **part of the design process of our products since 2019**, are intended to highlight our sustainable approach to product lifespan, while preserving our head start in the fields of repairability and recyclability.

The repairability index (IREP) was the first to be formalized after discussions were initiated in 2018. It assesses the repairability performance of our products, which depends on a combination of three factors: **how easily they can be taken apart, availability of spare parts, and the degree of technical expertise required for repairs**.

IREP enables each of our products to be graded on a scale from 0 to 2:

Cannot be repaired

Can be repaired by a professional with access to specific tools or expertise

Can be easily repaired by consumers using simple tools (e.g. screwdriver)

As for **the recyclability index (IRCY)**, it measures the recycling potential of products at the end of their lives. It considers **the types of materials used to make the product, the presence or absence of recycling obstacles** (ease of material separation, electrical or electronic components, etc.), and **the availablilty of recycling infrastrucure**.

The classification thus comprises three categories, represented by a specific color code:

Non-recyclable

Mostly recyclable

Totally recyclable

In the context of this continuous improvement initiative, these indexes, proactively created by Fermob, are designed to evolve. They will be adapted over time to include an increasingly precise score criteria.

MEASURING AND PROMOTING THE ENVIRONMENTAL IMPACT OF OUR PRODUCTS

Whether it's **using raw materials efficiently**, **reducing production waste**, **optimizing packaging**, or **designing products built to last**, **eco-design** has been in our DNA for over 30 years

In addition to developing our in-house IREP and IRCY indexes, we conduct **Life Cycle Assessments (LCA)** for our products. The LCA is based on a rigorous scientific approach:

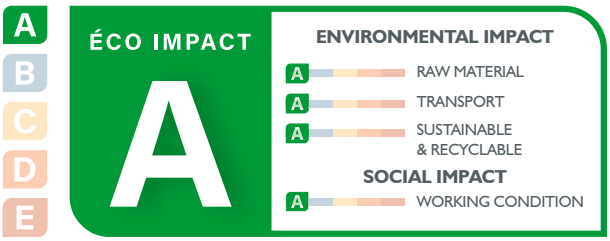

- **Multi-stage**, evaluates every phase of a product's lifecycle.
- **Multi-criteria**, assesses 12 to 16 environmental factors, including impact on air, water, biodiversity, and climate etc.

This comprehensive evaluation allows us to measure the total **environmental impact** of our furniture and lighting. To date, the Fermob Group is **the only French manufacturer** in its sector to conduct this assessment across its **entire product catalog** (excluding accessories).

Our Twofold Objective:

- **Improve the environmental performance** of both current and future product
- **Demonstrate our commitment and expertise** in sustainable design.

For our furniture, the results of each of our LCAs are expressed as a score, a letter associated with a color, which provides **clear and informative insight** on the environmental impact of our products. As such, **81%** of Fermob products have been awarded an A or B classification (with 52% receiving an A), meaning that Fermob **furniture is among the most sustainable on the market**. This is a real source of pride and recognition of the work we have been carrying out for many years. Because an 'A' rating is awarded only to the top 20% of products across the entire industry, this achievement is a major milestone that validates our years of dedication to eco-design. By taking this proactive, industry-leading approach, Fermob has anticipated upcoming environmental labeling regulations. All environmental scores and LCA fact sheets are readily available on our B2B and B2C websites.

A B C D E ÉCO IMPACT

We are working closely with Eco Impact, an independent third-party partner, to guarantee the authenticity and accuracy of this score. This means that we are fully aligned with our commitment to providing **clear and transparent information** to our customers.

Unlike furniture, lighting products do not receive an A-to-E impact score because the lighting category is not covered by current industry standards. However, you can find a climate impact graph detailing the product's usage impact, along with its official energy label, on Fermob.com..

MAXIMIZING DURABILITY WITH SPARE PARTS

In order to **extend the service life of our products** and **promote their durability**, certain components can be replaced in the event of wear or deterioration over time. In our catalog, we offer a wide range of **spare parts** for **furniture** and **accessories**, including protective pads for chairs and tables, glide pads and cushion covers. We also offer spare parts for **lighting products**, such as diffusers and power supplies.

See our price list for a detailled list of spare parts

Find all our spare part information by scanning the QR code:

MANAGING END OF LIFE

Fermob has been working with Ecomaison since 2013; this eco-organisation collects and restores used furniture to give it a second life or ensures the recycling of its materials.

ecomaison

Ecomaison's missions are to collect and sort used items of furniture and to meet the recycling and recovery targets set by public authorities. Fermob commits to this process by:

- Continuing our long-standing commitment to **eco-design**
- **Raising customer awareness** about recycling fees and sustainable habits
- **Partnering with non-profits** to support furniture donation **and reuse**

REDUCED AND RECYCLABLE PACKAGING

Fermob is a long-standing member of **CITEO**, an **organization focused on collecting and recycling packaging**. Together, we work to turn packaging waste into renewable resources and champion reduced packaging—designing eco-friendly packaging that minimizes raw material usage.

CITEO

REPAINT

GIVE NEW LIFE TO YOUR FURNITURE

Fermob has **prioritized sustainability** since day one. Whether through 100% recyclable materials, solvent-free paints, zero-waste powder-coating, or heat-recovery systems, every step in our manufacturing process is designed with the environment in mind.

FERMOB STRENGTHENS ITS ENVIRONMENTAL COMMITMENTS

re-paint

Together with our longtime paint supplier Axalta, Fermob offers **a certified local refinishing service**. This network of **expert powder-coaters** gives furniture a second life while keeping transit short and environmental impact low.

In exclusive partnership with AXALTA

HOW DOES IT WORK?

FOR CONSUMER:

1. Submit a Request: Visit **https://re-paint.com/renovation-fermob** to find a local refinisher and upload photos of your furniture.
2. Eligibility Check: The specialist verifies the furniture's authenticity and eligibility. (Note: For technical reasons, certain lines—such as the Bistro collection—cannot be repainted).
3. Get a Quote: The refinisher contacts you directly with an estimate.
4. Refinishing: Once approved, the specialist restores your furniture.
5. Enjoy: You get a beautifully refreshed piece built to last!

FOR CONTRACT CUSTOMERS:

1. Submit a Request: Fill out the online form at **https://www.fermob-contract.com/fr_fr/services/re-paint-renovation-peinture-mobiliers-fermob**
2. Dedicated Support: Fermob's commercial sales team manages the entire refinishing project from start to finish.

For CONTRACT CUSTOMERS, Fermob manages the entire repainting project.

KEY HIGHLIGHTS

- More than 160 eligible Fermob products
- A selection of 17 exclusive Fermob colors
- A network of around 30 certified professionals across France

CONTRACT DEPARTMENT

DEDICATED TO PROFESSIONAL PROJECTS

PROJECT ENEDIS VILLA – FRANCE

CONTRACT DEPARTMENT

DEDICATED TO PROFESSIONAL PROJECTS

We design professional outdoor spaces as true showcases. Hotels, restaurants, offices, public spaces… Every project deserves a **comprehensive and tailored approach**: furniture, lighting, parasols and decorative accessories, all carefully selected to create a unique environment.

With a long-standing presence in the professional market, we now offer more than **60 collections and 400 product references**, complemented by customized solutions and special products.

To support you, our Contract Department brings together **a dedicated team of 50 experts**. Their mission is to advise you, create 2D/3D project designs and BIM files, develop tailored solutions, and coordinate manufacturing, delivery, installation and assembly.

Architects, design agencies, retailers and specifiers, in France and internationally: the Contract Department is **your partner for creating sustainable outdoor spaces that welcome the public**.

A DEDICATED TEAM SUPPORTING SPECIFIERS

Whether you're an architect, commercial dealer, landscape or interior designer, Fermob's Contract Department is your trusted global partner for creating sustainable, high-traffic outdoor spaces.

Our specialists provide:

- **Up-to-date resources:** Metal and color swatches, digital catalogs, and technical data sheets
- **Project modeling:** 2D/3D layouts and CAD files to support your designs (also available on pCon)
- **Design & space optimization:** Custom mood boards and spatial planning
- **Comprehensive layout** solutions: Tailored concepts for terraces, rooftops, pool decks, entryways, outdoor workspaces, and lounge areas

Whatever your project—hospitality, restaurants, public spaces or commercial environments—the Contract team is here to help you create spaces that are as attractive as they are functional.

COURTYARD BY MARRIOTT LYON EUREXPO STADIUM

CONTRACT DEPARTMENT

OUR SERVICES

FERMOB SERVICES – DEDICATED TO PROFESSIONALS

Fermob has built its reputation through close collaboration with professionals.

This close partnership has shaped our deep commitment to service and quality, allowing us to deliver tailored support that meets the unique needs of every client.

ASSISTANCE WITH YOUR PROJECTS

A specialized team of consultants proposing 3D drawings to help you vizualise your projects and assist with the layout and design of your outdoor areas.

PERSONALIZED ADAPTATION TAILORED TO YOUR REQUIREMENTS

Our Special Projects department is available to propose products to meet specific requirements in terms of your brand identity (charter, logo, etc.), particular functions or custom designs.

INSTALLATION

As well as delivering your order, we can arrange for trained personnel to unpack, assemble and install your furniture and collect packaging from any new products. For a furniture replacement project, we can also collect your old furniture.

LEASING OPTION

Have you considered long-term rental for your outdoor equipment? Fermob proposes easy, optimized payment solutions with 12-60 monthly instalments to finance your outdoor equipment project. In addition to developing your project, our teams can assist with financial optimization, including long-term rental options and three-year replacement offers to preserve the optimal attractiveness of outdoor areas, which are a precious asset to showcase your quality of service...

CUSTOMLAB

WHEN YOUR PROJECT IS LIKE NO OTHER

At Fermob, we know that no two places tell the same story. We have created **CustomLab,** our dedicated department for bespoke projects that go beyond the ordinary: public spaces, hotels, restaurants, corporate headquarters, rooftops, campuses and urban destinations.

Our mission: to transform your ideas into unique creations, combining design, industrial expertise and creativity.

You imagine it. We bring it to life.

GIVE YOUR SPACES A DISTINCT IDENTITY

Your furniture can become much more than simple equipment. It can tell your story, reinforce your image and create a memorable experience for your visitors.

GRAPHIC CUSTOMIZATION

- Logos, messages and illustrations
- Engraving, laser marking or screen printing
- Signage integrated into furniture

BESPOKE TEXTILES

- Embroidery
- Printed fabrics
- Exclusive finishes

BRANDING EXPERIENCE

- Customized packaging
- Limited editions
- Event-specific collections

Because a remarkable place deserves furniture that reflects its character.

COLOR WITHOUT COMPROMISE

Color is part of our DNA. Whether you are looking for a signature shade, a custom color scheme or a palette created exclusively for your project, we can help you create the truly unique spaces.

PERSONALISED LUXEMBOURG COLLECTION – 1000 STÜHLE PROJECT – COLOGNE, GERMANY

CREATE YOUR OWN COLOR PALETTE

- Special colors (RAL, RAL Design or equivalent)
- Color coordination between furniture, parasols and textiles
- Development of exclusive shades

Your project deserves its own visual identity.

THINK BEYOND FURNITURE

Every project has its own challenges. We enjoy turning them into opportunities.

ADAPT

- Customized dimensions
- Exclusive configurations
- Unique shapes

REINFORCE

- Intensive use environments
- High-traffic locations
- Operational constraints

SECURE

- Ground fixing solutions
- Anti-theft systems
- Discreet cable management solutions

We design solutions built to last and to adapt to the rhythm of your spaces.

CREATE WHAT DOES NOT YET EXIST

Sometimes the right product does not exist yet. So we create it. Drawing on our expertise in steel, aluminum and our in-depth knowledge of color and collections, we develop exclusive solutions tailored to your needs: chairs, benches, tables, plant stands, urban furniture or complete fully furnished spaces. We turn your vision into reality.

MORE THAN FURNITURE. AN EXPERIENCE.

We do not simply design spaces. We imagine destinations where people stop, connect and gather. Spaces people remember. Places they return to. A successful project is measured not only by its appearance, but by the experience it creates.

Fermob CustomLab. Creating the exceptional.

FERMOB

THE COLOR EXPERT

For over 30 years, **Fermob has made color its hallmark**. Very early on, Bernard Reybier understood that color is much more than just a finish. Color defines a space, reflects personality and emotions, sets a room apart, brings character and **a bold spirit**.

In a market that was initially limited to two colors (white and English green), Fermob revolutionized the outdoor furniture industry by offering an **original range of bright, intense and contrasting colors**. Today, the brand is expanding its **color expertise** with more subtle shades that allow you to **create your own palette** and **play with contrasts and harmonies** to give character to any space.

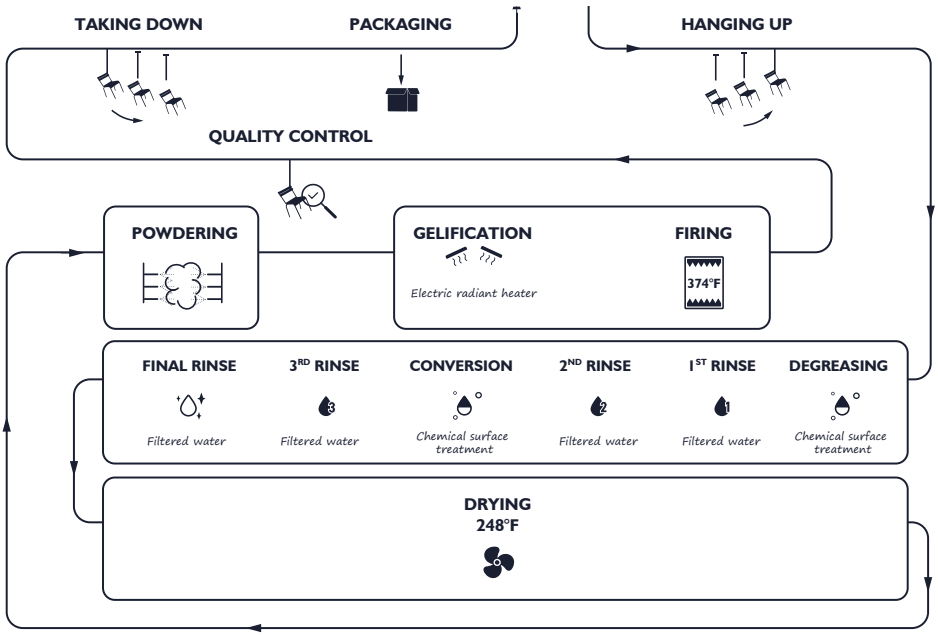

With **25 unique colors**, designed not only to be used on their own, but also to complement and enhance each other, the range offers an infinite number of combinations **to create inspiring and one-of-a-kind interior and exterior spaces**.

And to give its color chart a boost, the brand regularly develops new shades. This season, Fermob is expanding its color chart with **2 shades,** bringing fresh vibrancy to both indoor and outdoor furniture.

Fermob's **color experts** develop a wide range of shades, whether soft and soothing or bright and vibrant, timeless or daring. Before each launch, intensive tests are carried out to ensure that the colors are suitable for **demanding outdoor use**, guaranteeing:

- long-lasting color
- scratch resistance
- UV resistance
- moisture resistance

In terms of production, the company has invested heavily in its facilities, and now boasts the **world's most efficient painting line** in its market! A **color change** takes just **six minutes**, and the 25 shades on the color chart can be applied over three days, making this **impressive industrial** tool both **flexible and responsive**.

Painting process on the historic Thoissey site

All Fermob metal products are painted with a **100% polyester powder coating**, which has higher UV resistance than the epoxy paints generally found on the market. Paint is applied **electrostatically on the furniture for optimum coverage**, and then the product is baked at a high temperature.

To improve anti-corrosion performance, surface treatments (galvanising, electro-galvanising, electrolytic coating) are added before standard or optional painting.

OUR PARASOL BASES **P.238 to 344**

EXAMPLES :

BELLEVIE, BEBOP & YUNOS

FURNITURE

OUR COLLECTIONS

Fermob has been reinventing furniture with the same passion for more than 30 years, bringing together **innovation, design**, and **durability**.

Our signature ?
Practical, comfortable furniture available in an **exclusive colors palette.**
Dining, Lounge, and **Smart Furniture** collections designed to enhance every moment and transform living space.
Whether relaxing, entertaining, gathering, or working, Fermob follows your journey and brings solutions to every lifestyle - from a chair to a planter.

And then there is that extra touch…
The French **« art de vivre »**, where elegance meets practicality and style blends with simplicity to enhance terraces and gardens.

INSPIRED DESIGN & INNOVATION

Fermob furniture is known for its **sleek** lines, **vibrant** colors, and meticulous attention to detail.
Whether born from collaborations with renowned designers or created by the Fermob Studio, every piece is designed to combine **ergonomics** and **aesthetics** seamlessly.

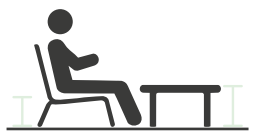

DURABILITY

The brand uses **durable materials** (such as steel and aluminum), combined with high-performance **paints**.
Together, they ensure **long-lasting durability** even in **harsh outdoor conditions.**

SEAT HEIGHT

DINING LOUNGE

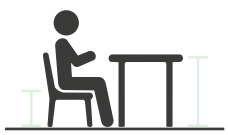

Armchair, sofa,
and mid-height table

17.75 in. 25.5 in.

ALIZÉ

8906 - SUNLOUNGER

DESIGN BY PASCAL MOURGUE

Tubular aluminum frame
Duo or Stereo OTF Batyline® outdoor fabric bed - high-tenacity
100% polyester thread coated in solution-dyed PVC
Adjustable backrest 5 positions (0°-20°-30°-38°-45°)
Adjustable footrest 2 positions (0°-7°)
Integrated wheels
Adjustment system: stainless steel wire
Zero gravity position available
Stacking capacity: x 15 (Height – stacked: 55.5)
Available colors: see limited color chart
Compatible with:
17 X 6 X 2 IN. - COLOR MIX

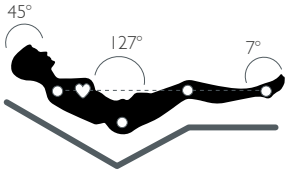

The **"zero-gravity" position**, as found on the Alizé sunlounger, is **perfect for relaxing** and is widely recommended by medical professionals.

It is this posture, with the legs positioned slightly above the heart, that the body adopts in a weightless state. The position was named by NASA in the 1970s. The sensation of gravity is reduced seven-fold, similar to when the body is floating in water.

The legs are elevated, creating a 127-degree angle between the thighs and torso, which helps to:

- Significantly easing pressure on the lower back and spine.
- Reducing tension in the lower back muscles.
- Promoting improved blood flow in the legs and reducing strain on the heart.
- Freeing up the rib cage and allowing the lungs to expand, which improves oxygenation.

LODGE

EXPERTISE
VLAEMYNCK

Discover the elegance of the LODGE collection. Each item in this teak collection embodies a **sophisticated**, **timeless style**. Teak, with its natural warmth and sturdiness, is at the heart of this collection, bringing a sophisticated charm to every lounge and dining area. Select items feature sleek aluminum accents for a touch of modern lightness, while high-quality fabrics deliver exceptional comfort, softness, and customization.

LODGE is a **comprehensive collection**, ideal for embellishing all areas of an establishment. Every detail has been meticulously thought out to ensure perfect harmony. Immerse yourself in a universe offering a natural balance between comfort and visual appeal as you fall under the spell of this charming collection.

LAYOUT N°1

LAYOUT N°2

LAYOUT N°3

COMFORTABLE CUSHIONS DESIGNED FOR OUTDOOR USE

UV RESISTANT | WATER-REPELLENT TREATMENT | BREATHABLE: QUICK-DRYING | ANTI-STAIN AND MOLD TREATMENT | TEARPROOF AND RESISTANT TO ABRASION | REMOVABLE COVERS | MACHINE WASHABLE

⚠ **Cushions must be brought inside during bad weather.**

FILLING : HIGH-RESILIENCE POLYURETHANE FOAM ON MODULAR UNITS / ARMCHAIR AND SOFA

High resilience polyurethane foam padding:

Chosen for its ability to return to its original shape after deformation, even after long periods of use.
Cushion thickness: 4.7 in.

Backrest polyurethane flock foam filling.

The modules are supplied with silencing pads.
Double glides available to connect the modules together and make the layout more stable.

FURNITURE COMPLEMENTS

OUR COLLECTIONS

Drawing on its craftsmanship, Fermob applies its expertise and innovation to the service of **outdoor comfort and elegance.** For over 10 years, the brand has been has offered **furniture complements** designed to enhance and extend the experience of its chairs and sun loungers.

True everyday companions, Fermob seat pads, cushions and sun lounger mattresses are designed to combine **comfort, durability and style,** while standing up to the demands of intensive outdoor use.

THE IMPORTANCE OF FURNITURE COMPLEMENTS

As essential elements of comfort, atmosphere and the **brand identity,** outdoor accessories play a central role in personalizing the customer experience. They bring added value to furniture by providing an additional **sensory and aesthetic dimension.**

Soft seat pads, enveloping cushions, generous sun lounger mattresses… furniture complements transform every seat into a unique relaxation space, creating a **warm and welcoming atmosphere.**

OUTDOOR TEXTILES

For its textile accessories, Fermob works with suppliers with proven **outdoor expertise** (Serge Ferrari, Margueroy, Tuvatextil, Vlaemynck, etc.) to guarantee impeccable and high quality products for all kinds of uses.

Cushions, seat pads, and mattresses are designed in collaboration with experts (stylists, designers, industrial specialists, etc.) selected for their quality standards. Our fabrics are made by French or European partners. Our **Jacquard and printed fabrics and Batyline® OTF** (Outdoor Technical Fabric) are made in France.

The fabrics used for our textile accessories:

- Have **technical properties** to ensure lasting resistance to life outdoors without being damaged (UV color resistance, water-repellent & stain protection treatments, mold resistance, etc.)
- Are **easy to clean** (removable covers that can be machine washed at 86°F)
- Comply with **standards** and are tested for their durability
    - Color resistance to the sun and weather
    - Resistance to abrasion and friction
    - Tear resistance

INDOOR FURNITURE MATERIALS

OUR COLLECTIONS

For over 30 years, Fermob has cultivated **the art of furnishing spaces** with thoughtful design, creativity, and innovation.

«Naturally, our furniture has found its way from our gardens into our homes,
bringing **color, style, and quality** with it.»

MIXING MATERIALS TO ENHANCE EVERY INTERIOR

For decades, metal has been worked with passion and precision by skilled hands in Fermob's workshops.

Always evolving, the brand explores **new materials — natural wood (beech, oak), stained wood, leather, indoor fabric, FENIX®** — «indoor fabric, FENIX. It enriches its collections with pieces featuring soft lines and welcoming shapes, designed to integrate with elegance into **every living space**. From dining areas and home offices to hotel bedrooms and meeting rooms, every piece is designed to **furnish, accessorize, and illuminate interiors with style.**»

To achieve this, Fermob works with **specialist workshops** and **carefully selected suppliers** to develop ranges combining metal with other **noble materials,** dedicated exclusively to the indoor world.

Surprising's leather is full-grain and really strong, and it will hold up remarkably well over time. This vegetable-tanned leather, a natural process that respects the environment, is dyed in the mass, giving it a clean reverse side and a tinted edge, a guarantee of superb quality. A Scotchgard finish gives it all its waterproof properties and protects the leather from stains and aging.

SURPRISING & BEBOP

DECORATIVE ACCESSORIES

OUR COLLECTIONS

Drawing on its craftmanship, Fermob applies its expertise and boldness to the service of **overall spatial design.** For over 10 years, the brand has been offering **decorative accessories** to complement its main product lines: outdoor furniture.

Design favorites and perfect gift ideas, Fermob's decorative accessories (coat stands, wall hooks, vases, single-stem vases, trivets, bird feeders, mirrors, and cushions) are created **to enhance both indoor and outdoor spaces** while withstanding the demands of outdoor use

THE IMPORTANCE OF DECORATIVE ACCESSORIES

Decorative accents are essential to the **brand's aesthetic, atmosphere, and identity**—playing a key role in a tailored customer experience by adding a deeper emotional dimension to the furniture.

Bright cushions, clever catch-alls, colorful trays and trivets... accessories are the perfect way to add a unique, personalized touch to any space, creating a warm and welcoming atmosphere.

OUTDOOR TEXTILES

For its textile accessories, Fermob works with suppliers with proven **outdoor expertise** (Serge Ferrari, Margueroy, Tuvatextil, Vlaemynck, etc.) to guarantee impeccable, high quality products for all kinds of uses.

Cushions, foutas and placemats are designed in collaboration with experts (stylists, designers, industrial specialists, etc.) selected for their quality standards. Our fabrics are made by French or European partners. Our **Jacquard and printed fabrics and Batyline® OTF** (Outdoor Technical Fabric) are made in France.

The fabrics used for our textile accessories:

- Have **technical properties** to ensure lasting resistance to life outdoors without being damaged (UV resistant, water-repellent & stain protection treatments, mold resistance, etc.)
- Are **easy to clean** (removable covers that can be machine washed at 86°)
- Comply **standards** and are tested for their durability
    - Color resistance to the sun and weather
    - Resistance to abrasion and friction
    - Tear resistance

UV RESISTANT | WATER-REPELLENT TREATMENT | BREATHABLE: QUICK-DRYING | ANTI-STAIN TREATMENT | TEARPROOF AND RESISTANT TO ABRASION | REMOVABLE COVERS | MACHINE WASHABLE

The **metal accessories** are made in the same factories as our furniture. They are designed according to the same quality standards (steel, anti-UV powder paint).

Like all Fermob products, our accessories integrate the brand's basic standards: **creativity, design and colors,** to ensure **style, originality and practicality.**

OUR COLLECTIONS

RANGE OF FABRICS FOR OUR PARASOLS

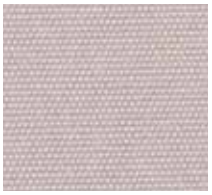

At Vlaemynck, our exquisite finishes are testament to our expertise, **from the material we source down to the smallest details on our products**.

Although a parasol has a practical purpose, it also has a key role as part of the decor and acts as the centrepiece of a terrace. With its enormous proportions and its incredibly important role, each parasol requires particular attention. That's why most of **our Vlaemynck parasols have a white braid finish**, the brand's iconic signature, and **are delivered with their own storage cover** (excluding the PAXI collection).

FERMOB, LEADING BRAND FOR LIGHTING

DECORATIVE, PORTABLE, INDOOR & OUTDOOR

A STORY FULL OF PROGRESS

1890 - 1900

Creation of the company from a blacksmith's workshop.

1974

A change of name, **the company was renamed Fermob**.

1989

Acquired by Bernard Reybier, Chairman of the Board, the company relied on the expertise of its original 10 employees, innovation, and an expanding international presence to grow into an enterprise that employs over 450 people today.

2000

1st Fermob shop opened in Paris.

BALAD, *H.10 lamp*

2015

Creation and marketing of the **1st portable lamp on the market**. ***"Lighting becomes portable."***

2017

MOOON!, *H.16 lamp*

2nd collection launched ***"The 1st wireless table lamp."***

MOOON!, *H.53 lamp*

1st wireless smart lamp. ***"Lighting becomes intelligent."***

2019

2020

HOOPIK, *String light L 590,5*

1st sector lamp ***"A genuine suspended lighting solution."***

APLÔ

1st wireless lighting solution. ***"A genuine lighting concept."***

2021

Opening of 1st **Contract Showroom** in **New York**.

Baptiste Reybier, son of Bernard Reybier, was appointed as **Managing Director**.

2022

2023

OTO, *H.11 lamp*

7th collection launched with a wireless table lamp with 2 light diffusers.

SWiiNG, *Lamp H.8*

1st table lamp with an integrated toggle switch

2024

2025

YUNOS, *Solar floor lamp H.70*

Introducing our first solar-powered, self-sufficient floor lamp.

BALAD², *Lamp H.10 & H.15*

The nomadic revolution: Balad²

New version: boosted performance, enhanced finishes.

2026

FERMOB: A UNIQUE LIGHTING IDENTITY

Fermob lighting builds **on the fundamentals of the brand:** ease of use, versatility, continuous innovation, a design approach.

Fermob offers a **variety of products for a range of lighting scenarios** (with different light temperatures, intensities) and custom **accessories for a unique user experience, just right for every moment of life.**

Portable or in-place, solar-powered or battery-operated, wired or wireless, Fermob lighting fixtures share a common denominator: simplicity and versatility. **Designed to be placed, carried, or fixed,** Fermob lights offer **complementary uses:** setting the mood on a table, illuminating a bar area, highlighting a poolside, or marking a pathway.

A perfect combo for unique user experiences, just right for every different moment of life.

INNOVATION FIRST

CREATION

Apart from quality, **design is a major commitment for Fermob.** With an approach i**nspired by changing lifestyles and history,** the products also combine **Fermob's commitments to simplicity, attention to detail and, of course, aesthetics.** Beyond forming part of our **overall design vision,** these collections directly reflect our observations of how people live today.

DESIGN

Our development protocol takes everything into account: ergonomics, weight, ease of handling, disassembly, repairability and sturdiness. The result: a product built to last that brings genuine delight. **Fermob approaches new product development from a manufacturer's perspective** - leveraging its own in-house expertise while partnering with industry leaders to support growth

To support its growth in the lighting market, Fermob established a **dedicated task force to bring together complementary areas of expertise.**

PRODUCTION

Production is entrusted to the **IPW industrial group**, created by a joint French and Chinese team that works closely with Fermob. **Specializing in plastic injection and electronics**, IPW develops LED lighting control software and systems.

These innovative products are both accessible and affordable, featuring intuitive controls and strong eco-friendly credentials—including sustainable construction, repairable designs, and high energy efficiency

AN OFFER THAT PROMOTES ECO-DESIGN

FROM A TO Z

Designed for use in natural settings, all of Fermob's products are made using materials and processes that limit their environmental impact as much as possible. Fermob's design and aesthetic choices have always taken essential environmental priorities into account. From the design stage to the end of the product's life, Fermob is committed to addressing environmental issues.

For over 35 years, our commitment to sustainability has been more than a value, it is a core promise that sets our brand apart commitments adopted and they represent a genuine competitive advantage.

ECO-DESIGN

METAL, A RESPONSIBLE CHOICE

Our two main materials – steel and aluminum – **are 98% recyclable** and are processed though some of the most established recycling systems in the world.

SPECIAL ATTENTION PAID TO OUR MATERIALS & COMPONENTS

All of our lighting products have to meet several rigorous criteria from design through to production. Fermob guarantees exceptionnal quality products :

- Selection of **premium quality materials and electrical components** (aluminum, polyethylene, LED, glass, etc.),
- **Weather-resistant** materials sourced from top-tier global suppliers
- 100% polyester powder coating with **UV resistance**
- End-to-end oversight by a **dedicated quality assurance team**.

All of our lighting is certified:

The product design work includes performance of several tests in accordance with IEC 60598, testing component strength and uses (e.g. NF EN 60529, etc.)

IEC 60598: The international standard for all lighting that incorporates electric light sources, specifying general requirements for operation at power supply voltages up to 1000 V. The requirements and the corresponding tests cover classification, marking, and mechanical and electrical construction.

LED

Recyclable and far **more environmentally-friendly** than traditionnal lighting. They offer a long lifespan, 85% lower energy consumption **zero toxic mercury.**

Durable and recyclable high-performance electronic and electrical components

E.g., battery and LED PCB module

(PCB: Printed Circuit Board)

Low environmental impact paint

Better for the environment and for our health. The powder coatings used by Fermob are **solvent-free**. They applied in a **zero waste system** and are guaranteed for outdoor use.

Metal

A sustainable material. Steel and aluminum are **98% recyclable** supported by established global recycling networks.

Polyethylene or polycarbonate diffuser

Highly durable materials that are fully recyclable

EXTENDING THE LIFESPAN OF OUR LIGHTING

Our **eco-design approach** allows us to maximize the **repairability of our lightings products,** ensuring they are designed for easy disassembly right from the the start. At Fermob we always try to incorporate replaceable parts into all our lamps to extend their lifespan, including models under warranrty.

80% of Fermob's lighting products can now be taken apart, repaired and recycled!

Fermob designs its lighting products for easy disassembly to extend their overall lifespan. Multiple components are easily replaceable (see detailed list on p. 282 and in our Price List).

Each package is marked with **repairability symbols** indicating the **type of disassembly** (requiring a professional or able to be completed by user) and specifying the **type of repairability** (light source and/or control unit).

Let yourself be guided by our short **explanatory** and **educational videos**:

A RANGE THAT EMBRACES ECO-DESIGN

FROM A TO Z

WHERE CAN I DISPOSE OF A USED LIGHT?

When disposing of a **used lighting product**, it is mandatory to **disassemble your light and place it at an authorized collection site**. The instructions and packaging give the user information, by means of regulated markings, to ensure that the materials can be recycled or recovered at the end of their life.

Manufacturers and users have **obligations in terms of management of Waste Electrical and Electronic Equipment (WEEE)**. This symbol indicates that the lighting products must not be put in bins intended for household waste.

WASTE COLLECTION CENTRE

These sites, generally managed by local authorities, take your used products and transfer them to the appropriate processing systems.

RETAIL SHOP

Stores that sell these lighting products are obliged to take back the used products, whether they are small independent traders or large specialist shops.

Fermob

MANUFACTURER'S RETURN

Manufacturers take back the used products and transfer them to the appropriate processing systems.

Fermob partners with **ECOSYSTEM** for **processing waste electrical and electronic equipment,** and with **Screlec** for **batteries recycling**, - a partnership in place since the launch of our lighting collections

FERMOB LIGHTING AT A GLANCE: IP RATINGS, IK RATINGS & LUMENS

From the very beginning of the design process, every one of our lighting products is developed to fulfil one or more specific purposes. That's why we define the required IP (Ingress Protection) and IK (Impact Protection) ratings, along with the desired light output (lumens), right from the start. Certain material choices, such as bamboo, are intended exclusively for indoor use.

LIGHTING PRODUCTS CLASSIFIED BY IP RATING

IP INDEX
Defines the degree of protection provided by the equipment against the penetration of solid matter (first figure) and liquid matter (second figure). The rating ranges from 00 to 68 (according to standard NF EN 60529).

LIGHTING PRODUCTS CLASSIFIED BY IK RATING

IK INDEX

Defines the strength of a device against knocks and impacts,but not against falls. The test is carried out with a steel vertical or pendulum hammer. The rating ranges from 0 to 10 (according to standard NF 62262).

LIGHTING PRODUCTS CLASSIFIED BY LUMINOUS FLUX RATING

LUMINOUS FLUX – LUMEN (LM)
In photometry, luminous flux is a measure of the power of a light source as perceived by the human eye. It's the most commonly used indicator of the total amount of light emitted by a light source in all directions.

365700 - BAMBOO LAMP H.10 IN.

DESIGN BY TRISTAN LOHNER

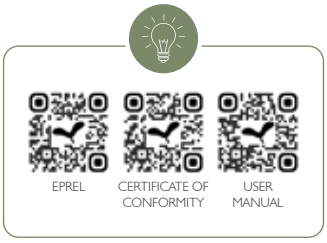

Polyethylen diffuser
Bamboo frame
ABS base
Technology: integrated LED - Luminous flux: 150 lm
Switch type: touch-activated dimmer
Function of the switch: change the brightness (10 to 100%, click 4 s), change the light temperature (double short click), ON/OFF (short click, 1s)
Lighting mood:
Position 1 cool white (5000°K) dimmer switch (10 to 100%)
Position 2 warm white (3500°K) dimmer switch (10 to 100%)
Position 3 candle-style warm white (2200°K) flickering
Type of power supply: battery - Min. Battery life (100%): 8 h
Battery use cycle: 2000 cycles
Recharge time: 6h - Type of recharge: USB-C Fermob magnet – cable (provided) 59 in.
Bypass to prevent battery damage during wired use
0.5 A - 3.2 V - 3.5 W | IP54 | IK 10 | CE | FCC | UKCA
Electric protection class: III
Energy rating: F

hoopik

MUCH MORE THAN A STRING LIGHT

STRING LIGHT16 RINGS L 590.5 IN.

HOOPIK is a fully fledged **aerial lighting solution**.

It consists of:

- 590.5 in. of matt black cable for easy suspension,
- 16 led rings adjustable through 360°,
- 2 fixing systems positioned at each end for easy installation.

The dimmer switch, which is easy to access once installed, means it's equally suited to both a muted lounge area and a large, brightly lit table.

HOOPIK, CADIZ, REST'O & COLOR MIX

SOLAR FLOOR LAMP H.70 IN. - YUNOS

332100 Black

CONTROL BOARD

3442 - CONTROL BOARD FOR APLÔ H.10 LAMP

Compatible with:
LAMP H.10 IN. - APLÔ

344200 White

3324 - SOLAR PANEL AND CONTROL BOARD FOR YLIOS & YUNOS H.70

NEW

Compatible with:
SOLAR FLOOR LAMP H.70 IN. - YLIOS
SOLAR FLOOR LAMP H.70 IN. - YUNOS

332400 White

DIFFUSERS

3440 - DIFFUSER FOR APLÔ H.10 LAMP

Polyethylene diffuser
Compatible with:
LAMP H.10 IN. - APLÔ

344000 White

3664 - DIFFUSER FOR BALAD² H.10 LAMP

Polyethylene diffuser
Compatible with:
LAMP H.10 IN. & LAMP BAMBOO H.10 IN. - BALAD²

366400 White

3666 - DIFFUSER FOR BALAD² H.15 LAMP

Polyethylene diffuser
Compatible with:
LAMP H.15 IN. & LAMP BAMBOO H.15 IN.- BALAD²

366600 White

5394 - DIFFUSER FOR MOOON! H.16 LAMP

Polyethylene diffuser
Compatible with:
LAMP H.16 IN. - MOOON!

539400 White

5391 - DIFFUSER FOR MOOON! H.53 LAMP

Polyethylene diffuser
Compatible with:
LAMP H.53 IN. - MOOON!

539100 White

DIFFUSERS

4031 - DIFFUSOR FOR SWIING H.8

NEW

Compatible with:
LAMP H.8 IN. & SET OF 6 LAMPS H.8 IN. - SWIING

403100 White

3322 - DIFFUSER FOR YUNOS H.70

NEW

Polyethylene diffuser
Compatible with:
SOLAR FLOOR LAMP H.70 IN. - YUNOS

332200 White

LIGHTING MODULE

3680 - LIGHTING MODULE FOR BALAD² H.10

NEW

Compatible with:
LAMP H.10 IN. – BALAD² & BALAD² BAMBOO

368000 White

3682 - LIGHTING MODULE FOR BALAD² H.15

NEW

Compatible with:
LAMP H.15 IN. - BALAD² & BALAD² BAMBOO

368200 White

5395 - LIGHTING MODULE FOR MOOON! H.16

The replacement of the LED lighting module depends on the serial number indicated on the base of the lamp. For lamps with a serial number lower than S220501, it is not possible to replace the LED lighting module.
Compatible with::
LAMP H.16 IN. - MOOON!

539500 White

5393 - LIGHTING MODULE FOR MOOON! H.53

Compatible with:
LAMP H. 53 IN. - MOOON!

539382	Cactus	539321	Acapulco Blue
5393B9	Black Cherry	539320	Red Ochre
539347	Anthracite		

4030 - CONTROL BOARD AND LIGHTING MODULE FOR SWIING H.8

NEW

Compatible with:
LAMP H.8 IN. - SWIING
SET OF 6 LAMPS H.8 IN. - SWIING

403000X1 White

LIGHTING MODULE

3320 - LIGHTING MODULE FOR YUNOS H.70

NEW

Compatible with:
SOLAR FLOOR LAMP H.70 IN. - YUNOS

332000 White

PAD AND SCREW

2814 - 6 PADS AND CLIP FOR STANDS BALAD²

Compatible with:
UPRIGHT STAND - BALAD²
SPIKE STAND - BALAD²
OFFSET STAND - BALAD²

281400 Black

2814A - BAG OF SCREWS FOR SPIKE STAND BALAD²

Compatible with:
SPIKE STAND - BALAD²

2814A Gris métal

2844 - BAG OF SCREWS FOR OFFSET STAND BALAD²

Compatible with:
OFFSET STAND - BALAD²

284400 Black

MOUNTING BASE - YLIOS

NEW

Compatible with:
SOLAR FLOOR LAMP H.70 IN. - YLIOS

Black

THE METAL

WONDERFUL MATERIAL OF IDEAS

Fermob crafts its furniture and lighting from metal, a material long associated with French innovation and enduring design. Chosen for its versatility, metal brings creative ideas to life while offering exceptional durability and the ability to be **recycled** again and again.

Steel and **aluminum**, our main raw materials, are **metals that can be recycled infinitely without losing quality**, with no alteration. They boast a **recycling rate of up to 98%**, meaning our products can be reintroduced into the production cycle time and time again. Furthermore, these materials are **extremely strong and resistant**, ensuring that our products are able to withstand the weather and wear and tear over time, guaranteeing a long service life.

STEEL

- Fermob's original expertise
- Stable and durable
- Creates an elegant design

ALUMINUM

- Malleable
- Lightweight
- Easy to weld

Whenever our designers and technicians are working on a new product, **anti-corrosion performance is always top of mind**. We're constantly thinking of ways to eradicate, or at least reduce, areas that could be prone to corrosion because they are not protected or treated.

Examples of **corrosion-prone areas** include: rims under table tops, air gaps, tubular parts, areas subject to friction, such as folding mechanisms, areas where the properties of the material have changed as a result of heat (such as from laser cutting or welding).

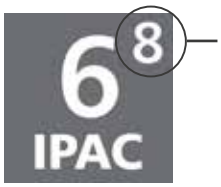

ANTI-CORROSION PROTECTION RATING

Fermob has introduced a new **Anti-Corrosion Performance Rating (IPAC)** for all metal items of furniture. The rating is an indication of the product's anti-corrosion performance, combining three factors: **design, material and surface treatment.**

Since all our items of furniture are designed for outdoor use, we systematically apply a surface treatment and high-performance outdoor paint to offer the very best protection against corrosion.

On a scale from 1 to 10, all Fermob furniture has a minimum IPAC rating of 6.

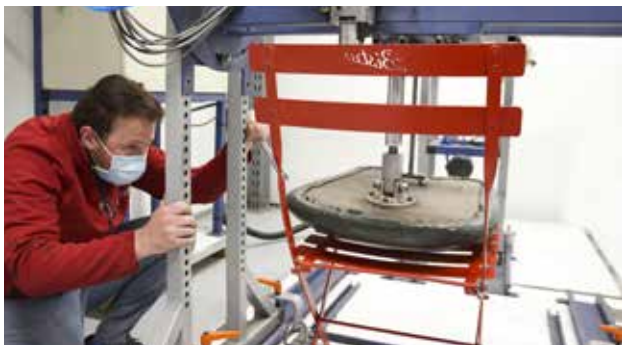

All products bearing this logo are eligible for additional, **optional anti-corrosion treatment** (contact our sales department).

The 1st figure gives the basic rating and the **2nd figure in the upper right-hand corner gives the IPAC after additional treatment**. Depending on the products and their design, the IPAC enhancement may be different.

Fermob furniture benefits from anti-corrosion treatments designed specifically for outdoor use. Our products undergo rigorous laboratory testing in accordance with **international safety standards** (NF EN 581-1), **stability** (NF EN 1022), and **resistance and durability for commercial use** (NF EN 581-2, NF EN 581-3).

TEXTILES

A SPECIFIC KNOW-HOW

For decades, we have refined our craft in specialized **outdoor** textiles, drawing on deep expertise at every stage—from collaborating with **technical partners to develop premium fabrics**, to manufacturing items built for demanding environments (dining seats, sunloungers, sofas, parasols).

From pattern-making and sewing to final assembly, our skilled craftspeople at the historic Vlaemynck facility in Burgundy execute every step with precision. This is our driving force: maintaining complete control over production, from raw materials to final finishing—an approach applied across all our group's products.

WHAT MAKES A GOOD OUTDOOR FABRIC ?

- A fabric with technical qualities to **resist outdoor conditions** over time, without degrading (resistance to UV rays, water-repellent & stain-resistant, mold-resistant...).
- A fabric that is **easy to maintain** (removable covers, machine-washable…).

UV Resistant | Water-repellent treatment | Breathable: quick-drying | Anti-stain treatment | Machine washable

100% ACRYLIC FABRIC

Composition: 100% acrylic

The threads used in this fabric are made from **solution-dyed fibers** during manufacturing. The pigments are added directly into the fiber, giving it excellent durability.

- **Easy to maintain machine** washable at 86°F.
- **Resistance and reliability**, fiber dyed in the mass: **unparalleled resistance to UV rays and weather**.
- **Water-repellent:** prevents the absorption of liquids.

A typology of fabrics, **different collections**:

- **Plain dyed:** ideal for making parasols, sling chairs, cushions (260g/m^2).
- **Textures:** very thick fabric (680g/m^2), 3-ply yarns and a more refined knit structure.
- **Geometric:** striped look with thick yarn weave (420g/m^2).
- **Mix:** woven fabrics with 3 yarn colors (360g/m^2).
- **Sunbrella Basketweave:** soft-touch appearance, similar to indoor fabrics while maintaining outdoor resistance (290g/m^2).

OUTDOOR TECHNICAL FABRICS

All the **Outdoor Technical Fabric (OTF)** used in Fermob products are **Batyline®** from **Serge Ferrari**, a leading French company in the international market. They are composed of **high-tenacity 100% polyester yarn protected by a PVC sheath dyed in the mass**, which guarantees:

- A **durable and strong** product (withstands a load of 4 T/m²);
- Fabric that does not sag (no fabric pockets forming after use);
- A **modern design** that retains its look over time.

The **4 stages of the manufacturing process** are fully mastered internally by the manufacturer: production of polyester yarn (core yarn), PVC extrusion (sheath), weaving of the fabric, and thermo-fixation.

Batyline® is the **most high-performance technical fabric** on the market and offers numerous benefits for outdoor use:

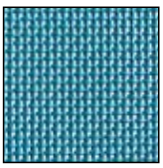

- **Anti-fungal:** prevents mold growth,
- **Extremely strong:** maintains tension thanks to ultra-regular weaving,
- **UV and weather resistant**,
- **Breathable:** does not retain moisture,
- **Comfortable:** remains soft, always cool even in summer,
- **Easy care:** cleans with soapy water and a sponge.

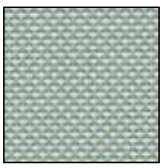

Batyline® DUO (Cactus)

Batyline® STEREO (Rosemary)

Batyline® ISO (Bondi Blue)

Batyline® EDEN (Sage)

Our 4 Batyline® types offer different weave characteristics and specific properties. The **Stereo fabric** is exclusive to Fermob, while **Eden** offers a soft, textile-like touch.

OTHER OUTDOOR TECHNICAL FABRICS

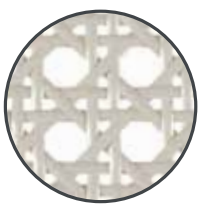

Specific to certain collections, referred to as TTE or TTE Sling finish. At Vlaemynck, all technical outdoor fabrics meet the following requirements:

- Low deformability
- Lightness and suppleness
- Strength
- Resistance to **UV** and **weather**

Collections concerned: IBIZA (sunlounger fabric only) & MARIETA.

WOVEN POLYMER THREAD

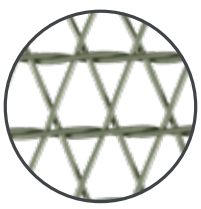

The seats of the **Croisette**, **Sixties**, and **Parisienne 21** collections are handwoven on an aluminum frame. Extruded from polymer resin (plastic), the yarn is then **hand-braided using traditional craftsmanship**. Each piece is unique and requires 8 to 19 hours of manual braiding.

Croisette Collection

Parisienne 21 Collection

Sixties Collection

The **Croisette** and **Parisienne 21** collections reinvent traditional weaving with a **textured flat weave**. The **Sixties** collection stands out with its **retro and graphic look**, achieved by **hand-braiding** in a **"scoubidou" style**.

TEAK

EXPERTISE VLAEMYNCK

Fermob draws on Vlaemynck's teak expertise, the **first brand to offer outdoor teak furniture in France**. For over 30 years, Vlaemynck's teak has come from the same facility in Indonesia, a trusted partner that ensures all the teak used in our collections comes from legal plantations, thus preserving the **longevity of this high-quality tropical wood species**.

Teak is a **millennia-old wood**, introduced to Indonesia in 200 AD. Initially used for building homes, it was gradually adopted for Armchair and boat construction, and today it is widely used in **outdoor furniture design**.

Teak possesses **exceptional natural properties**. Naturally rot-resistant thanks to the **oleoresin** it produces, it does not rot when exposed to moisture—even in extreme conditions. It is also highly resistant to **insects, fungi, and weathering**.

As the **king of outdoor woods**, teak requires no special maintenance to retain its natural qualities: **strength, durability, and ease of use**.

Appreciated for its comfort and beauty, teak has a **soft, silky feel**, remains **cool in summer**, and its **warm honey tone with copper hues** gradually develops into a refined **silver-grey patina** over time when left untreated.

The teak we use:

- Natural: **untreated and unoiled.**
- Grade C: features natural knots and patterns that give it an elegant, authentic look. Grade C teak may come from trees **under 30 years old** and not necessarily from the tree's heartwood, giving it a **lighter color and more visible grain**.
- For oiled teak tabletops: a protective oil is applied to the surface to better protect it against liquids and slow the development of the grey patina. **Regular care** is required to preserve its **original honey color**.

Vlaemynck's oiled teak tabletops are Grade A. The wood comes from the heartwood of trees aged between 30 and 50 years, ensuring a uniform color with no knots or grain patterns.

Teak reflects **Vlaemynck's expertise**, developed over the years in working with the most prestigious outdoor materials—as well as Fermob's craftsmanship, bringing warmth and comfort to its furniture pieces.

LODGE

AND MANY OTHER MATERIALS

TO COMPLEMENT METAL

INDOOR MATERIALS

LEATHER

Developed in collaboration with Childéric Sellier (expert saddle maker and manufacturer of quality leather work), our leather products showcase the perfect balance of **industrial mastery** and **traditional craftsmanship**. We use **full-grain leather** to preserve the material's natural integrity, allowing unique organic features to give every piece its **own distinct character**. Our leathers receive a **semi-aniline finish**—combining a protective aniline layer with pigment to ensure uniform color and enhanced stain resistance.

The leather used for Surprising is a **Spanish ox leather,** selected for its **durability**; it is designed to last for years. Tanned using plant-based techniques, it is solution-dyed, offering a regular finish and a high quality colored edge. **Scotchgard** fabric protector is applied to reinforce its resistance to water and protect it against stains and aging, thus guaranteeing **long life.**

OAK

At Fermob, feature oak across three collections: **Studie, So'o and Nuage.** The oak that we use is carefully chosen to highlight the **aesthetic and technical qualities of this noble wood.**

For our **Studie and Nuage** ranges, we use **top quality oak veneer.** The veneer is chosen for its natural beauty, bringing **timeless elegance** and **natural warmth** to our furniture, while guaranteeing **superior durability.**

For the tops of our **So'o oak tables**, we have carefully selected **premium-grade solid oak,** characterized by:

- Uniform dimensions: Planks are precision-sawn to matching dimensions.
- Superior quality: Meticulously inspected to meet the highest quality standards, free of major defects.
- Color and grain matching: Planks are hand-selected and paired to ensure visual consistency in color and grain pattern.

These properties mean that our furniture will **withstand the tests of time,** ensuring particularly long life.

BEECHWOOD

For the **Archie and Studie stained wooden** chair and armchair, we have selected beechwood for its **delicate grain pattern** and **natural appearance.** This wood, with its fine and uniform grain, is enhanced by a **colored water-based varnish applied manually** using a spray gun. This two-coat process — a first tinted layer followed by a clear protective coat — ensures a consistent finish while allowing the **wood's natural variations** to show through. The varnish reveals the **grain effects** and **subtle tonal shifts** unique to each piece, making **every seat one of a kind.**

This environmentally friendly varnish is formulated without harmful substances such as **heavy metals, formaldehydes,** or **halogenated compounds,** making it suitable for sensitive settings such as **public spaces, schools, or dining areas.** The shades developed for this finish have been carefully selected to blend harmoniously into indoor environments. They highlight the material while offering a color palette aligned with both **domestic and professional interior uses.**

FENIX®

Innovative material developed by Arpa Industriale, **FENIX®** is a true **revolution in design.** It is mainly composed of layers of paper soaked in thermoset resins, then polymerised to obtain its final structure. This material offers excellent **resistance to scratches, durability, easy cleaning** and a **modern style,** making it the perfect choice for tables, kitchen counter tops, desks and other indoor surfaces. These are its main properties:

Low light reflectivity, extremely matt surface

Anti-fingerprints

Soft touch

Thermal healing of superficial micro-scratches

GLOSSARY

ABS

Acrylonitrile Butadiene Styrene (ABS) is a relatively rigid, lightweight, impact-resistant and moldable thermoplastic polymer (a type of styrenic polymer, to be exact).

ABRASION

Wear caused by rubbing.

ACRYLIC

Synthetic fiber that is soft and silky to the touch, does not pill, and is ultra-light.

- extremely resistant to tearing and wear
- rotproof (i.e. prevents the formation of mold)
- keeps its shape
- UV and fade resistant
- does not retain heat or moisture
- resistant to temperature variations (-22° to +158°F)
- resistant to chemicals
- easy to clean: machine-washable at 86°F, no ironing required.

All our acrylic fabrics are water-repellent.

ANTI-UV

Anti-UV treated products are resistant to alteration caused by ultraviolet rays (present in sunlight and moonlight), meaning colors do not fade over time. All Fermob products are UV-resistant.

ANODISED ALUMINUM

Anodising is a process by which an ultrathin coating is applied to aluminum, giving it a specific color, hardening its surface (fewer scratches) and stabilizing its appearance over time. This treatment is ideal for saline environments.

BATTERY USE CYCLES

The battery's capacity gradually decreases with the use of the light. This is a natural phenomenon. A use cycle includes a complete discharge and recharge of the battery (if the battery is discharged to 50% and then recharged to 100%, this is equivalent to 1/2 cycles). On average, Fermob lights vary between 300 and 500 cycles of use per battery.

BRUSHED ALUMINUM

Brushed aluminum is an aluminum that has been mechanically treated with metal brushes.

BYPASS

A bypass is a circuit that avoids a device or system.

CAST IRON

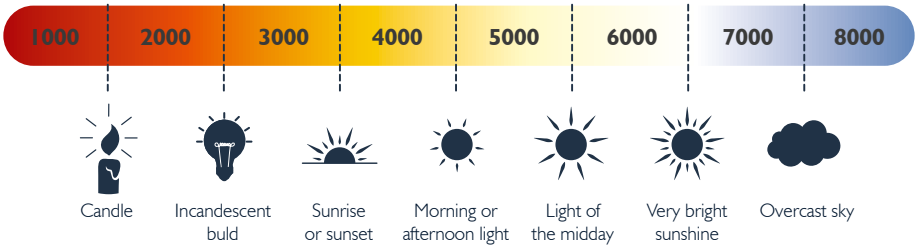

Cast iron is a carbon-rich iron alloy. Its density, weight, and sturdiness make it ideal for adding stability.

COLD-ROLLED STEEL

The laminated steel is passed through set of rollers to shape the material (for example, into sheet metal for table tops). Cold rolling is Fermob's technique of choice, as it strengthens the steel, ensures a precise, uniform thickness, and improves paint adhesion.

COLOR TEMPERATURE - KELVIN (°K)

Measures the color temperature of light, indicating whether white light is warm (yellowish) or cool (bluish). It varies depending on the source. The higher the figure, the cooler and more bluish-white the light, while a lower figure results in a warmer, more yellow hue.

ALTER THE COLOR TEMPERATURE TO CREATE THE RIGHT LIGHTING MOOD.

This feature lets you adjust the color temperature to the task at hand. Warm white (2.700 to 3.300°K) creates a comfortable mood that's perfect for relaxing. Neutral white (4.200 to 4.500°K) is more soothing and energizing. Cool white (5.500 to 6.500°K) is closest to natural daylight, with a slightly blue hue that boosts focus and concentration.

DRALON®

A woven textile made from synthetic fiber that offers excellent resistance to water, stains and UV rays. It is soft in texture, bright in appearance, rot-proof and easy to clean.

ELECTROLYTIC COATING

Originally developed for the automotive industry, this electro-deposition process completely immerses components in a water-soluble primer bath. The resulting base layer provides maximum corrosion resistance—ensuring superior protection for products designed for intensive commercial use or humid environments.

ELECTROGALVANISING

Protecting an object by applying a layer of zinc using electrolysis (electrical energy).

ELECTROSTATIC

An eco-friendly painting technique that involves using powder instead of solvent-based paints. An electrostatic force attracts the powder coating to the metal, achieving optimal coverage. The coating is then baked onto the furniture.

FOAMS

ETHYLENE-VINYL ACETATE (EVA) FOAM
A dense, compact, hard-wearing foam (no cells or air bubbles) that's lightweight and easy to mold.
HIGH-RESILIENCE PU FOAM
A polyurethane foam selected by Fermob for its ability to return to its original shape after deformation, even following an extended period of use.
OPEN-CELL FOAM
A foam that allows liquid to pass through. It does not retain water and dries very quickly, meaning that the cushion does not stay wet.
POLYESTER FOAM
A PU-type foam with open cells and variable density. This versatile foam is typically used to make padding and occasional seats.
POLYETHYLENE FOAM (closed-cell)
A foam used for thermal insulation and for air-, water- and dust-proofing.
POLYURETHANE (PU) FOAM
A high-quality foam known for its firmness and comfort. It consists of fine closed cells enclosing a low thermal conductivity gas. It makes an excellent thermal insulator.
RETICULATED FOAM
A foam with very fine, regular closed cells. This is a rot-proof and waterproof foam.

GALVANIZATION

An Iron protection process that involves dipping a part into a bath of melted zinc.

GALVANIZED STEEL

Galvanised steel is crude steel with anti-corrosion treatment (a layer of zinc is applied to prevent is from rusting). Before painting, it has an untreated, matt grey appearance.

HPL TABLE TOP

High-pressure laminate (HPL) is a composite material made up of several layers of kraft paper and a thermosetting resinimpregnated decorative paper

HYDROFORMING

A manufacturing process used for Cadiz's armrests, in which a material is shaped by injecting a high-pressure fluid and working with the material. This process was previously used in high-tech industries such as aerospace.

IK INDEX

Defines the strength of a device against knocks and impacts,but not against falls. The test is carried out with a steel vertical or pendulum hammer. The rating ranges from 0 to 10 (according to standard NF 62262).

IP INDEX

Defines the degree of protection provided by the equipment against the penetration of solid matter (first figure) and liquid matter (second figure). The rating ranges from 00 to 68 (according to standard NF EN 60529).

JACQUARD FABRIC

On a Jacquard fabric, the patterns are made by criss-crossing threads. The Jacquard loom, developed in 1801 by Joseph Marie Jacquard from Lyon, is capable of creating weaves with complex patterns.

LACQUERED ALUMINUM

Lacquered aluminum is an untreated aluminum that has been painted.

LED - LIGHT EMITTING DIODE

An electronic and optical component that transforms the electric current passing through it into light. It has many advantages:

- economic
- ecological
- instant lighting
- long service life (25.000 to 100.000 hours)
- no critical materials (e.g. no mercury)

LOUNGE OTF

Outdoor Technical Fabric (OTF) is a Batyline® fabric manufactured in France by the world's leading firm, Serge Ferrari. This high-tenacity 100% polyester thread is protected with a solution-dyed PVC cover for exceptional color-fastness. OTF keeps its shape, is light, flexible and sturdy, and does not deteriorate over time. It is resistant to both moisture and micro-organisms, and is treated with an anti-fungal product. The tight weave, coupled with the performance characteristics of Batyline®, give this material a textile-like feel and make it ideally suited for outdoor use. Lounge OTF is a unique material which combines the elegance of a natural-looking textile with the performance characteristics of a technical fabric.

LUMINOUS FLUX - LUMEN (Lm)

In photometry, luminous flux is a measure of the power of a light source as perceived by the human eye. It's the most commonly used indicator of the total amount of light emitted by a light source in all directions.

PHOTOVOLTAIC PANEL

A photovoltaic solar panel is a device that converts sunlight into electricity using special cells known as photovoltaic cells. How does it work? The solar panel consists of photovoltaic cells, typically made of silicon, a semiconductor material. When sunlight hits these cells, it causes electrons to move, thereby generating a direct electric current. An inverter then converts this direct current into an alternating current, which can be stored in batteries. The advantages of a solar-powered lamp post are numerous:

- Utilizes a renewable, free, and infinite energy source (the sun)
- 100% self-sufficient and produces sustainable energy

PIPING

A narrow cloth strip between two pieces of fabric, slightly protruding at the seam.

POLYETHYLENE

Polyethylene is one of the most common thermoplastic resins in use today. It is known for its excellent impact resistance.

POLYPROPYLENE

Polypropylene, also known as PP, is a semi-crystalline resin, a synthetic fiber from the family of thermoplastic polymers. It has a number of excellent properties that are of great benefit in outdoor textiles, including high water resistance (water repellent) and UV resistance. It is made from non-toxic, non-allergenic substances (Oeko-Tex class 1) and is recyclable.

ROTPROOF

Guarantees against the formation of mold over time. This is an important guarantee for outdoor products.

SILENCING PADS

An exclusive, patented technology that allows furniture to slide effortlessly across the floor and features an integrated shock absorber to reduce vibrations. Comes as standard onLuxembourg & Salsa.

NOISE REDUCTION OF 14 DB = 10 TIMES QUIETER!

STAINLESS STEEL

Stainless steel is a steel and chromium alloy that is highly resistant to rust and corrosion.

SOLUTION-DYED

Fermob uses solution-dyed textiles (the dye is applied to the fiber, not the surface). This dyeing technique means that the color lasts five times longer than a conventional dye.

TEXTROL®

Natural plant oil-based wood saturator that helps wood retain its natural appearance for a long time. Does not form a film or chip off, does not peel away over time, does not darken under the effect of UV rays.Fermob uses this product on its Bistro Natural chairs.

WATER-REPELLENT

A water-repellent fabric does not instantly absorb water droplets. Instead, water slides off the surface. It reinforces the resistance to stains and mold. However, if the water is not removed quickly, it will end up being absorbed into the fiber (water-repellent is not the same as waterproof).

YARN-DYED ACRYLIC

A yarn-dyed synthetic fiber is dyed on the yarn after it has been manufactured.

PROTECTION & MAINTENANCE

FOR YOUR PRODUCTS

Fermob makes every effort to ensure that all its products are easy to maintain, thereby prolonging their lifespan.

See our tips for:

- Maintenance and cleaning
- Protecting your products from the elements
- Extending their lifespan (spray paint, rust inhibitors, spare parts, instructional videos)

Scan the QR codes to find information on **protecting and caring for your Fermob products**.

WINTERING & MAINTENANCE

TOUCH-UPS & REPAIRS

MAINTENANCE PRODUCTS

2865 - TOUCH-UP SPRAY (5.3 OZ)

Paint spray
Covers up scratches in the exact color of your furniture
Covers a surface of 5.3–6.4 sq

2973 - TOUCH-UP PEN (0.04 LB)

Precision paint touch-up pen
Covers up scratches in the exact color of your furniture

000921 - ANTI RUST PEN (0.04 LB)

Anti-rust precision pen
Prevents the spread of rust before painting

000920 - RUST-PROOFING PRODUCT (5.3 OZ)

Ready-to-use spray
Stops rust spreading before painting

CARE AND MAINTENANCE

000901 - MULTI-PURPOSE CLEANING PRODUCT

Ready-to-use spray
For cleaning all Vlaemynck furniture
Works on metal (aluminum or painted steel), Outdoor Technical Fabric (OTF) woven resin, synthetic fibers...
Do not use on wood (teak, nyatoh,...).
17.6 OZ

V3953NT - TEAK CLEANER

Cleans natural or oiled teak
35.2 OZ

V3953HT - TEAK PROTECTOR

Protects oiled teak and maintains its original color
35.2 OZ

V3953KT1 - COMPLETE TEAK RENOVATION AND MAINTENANCE KIT

Revives oiled teak

INCLUDES:
1 litre of teak cleaner (ref. V3953NT)
1 litre of teak protector (ref. V3953HT)
1 pair of gloves
1 single sponge
1 double sponge
1 scouring sponge
1 sandpaper sponge
1 soft cloth

THE FERMOB GUARANTEE

CHARTER

THE FURNITURE WARRANTY

When we design our products, we pay special attention to three key aspects:

- making sure the piece will continue to fulfill its intended purpose for years to come
- anticipating how it will age as time passes
- designing it so it is suited to our customers' requirements

As a manufacturer, we stand behind the quality of our products.

We never stop listening to our customers. Based on painstaking laboratory testing and real-world feedback, we updated our warranty to better reflect how our products perform over time.

Fermob's structural warranty means that products will remain fit for the purpose for which they were designed. The structural warranty covers all functional aspects of the product such as welding, fasteners, rivets, and folding.

Fermob's finish warranty covers premature and abnormal deterioration in the appearance of the product's materials, such as fading. The speed at which a product ages depends on how carefully it is treated by customers. Please read the exclusions so you know how to care for and maintain the products.

Warranty by raw material

	ALUMINUM PRODUCTS	STEEL PRODUCTS
STRUCTURAL WARRANTY	3 YEARS	2 YEARS
FINISH WARRANTY	2 YEARS	1 YEAR

Fermob has developed many types of products for use in specific settings. To maintain the warranty, the products must be used in the location or use for which they were designed.

Ex: products designed and manufactured for the domestic / residential use are not warranted for use in commercial settings.

1. ***Residential****: product designed for residential use in non-public spaces such as gardens, terraces, balconies and interiors.*
2. ***Contract:*** *product designed for professional use in supervised public spaces such as restaurants, pools, beaches, hotels, multi family or rental units, and corporate environments.*
3. ***Intensive Contract:*** *mobile product, not fixed to the ground, designed for commercial use in unsupervised public spaces such as public parks, highway rest areas, recreation facilities and public or corporate squares that are accessible for extended hours.*

Bistro Natural chairs are for covered use only; weather-related damage is excluded from warranty.

This warranty begins from the original purchase date. Warranty claims and remedies are determined at the manufacturer's sole discretion. Remedies include replacement, refund or prorated refund determined by length of use and severity of the defect. Any claim must be supported by the purchase receipt and photos.

Warranty Disclaimer: Fermob is not liable for any product that becomes hot due to sun exposure. It is the responsibility of the specifier to consider environmental conditions and ensure proper product selection and placement.

THE WARRANTY DOES NOT COVER:

- Products that have been altered, modified, converted, or repaired by third parties.
- Furniture not used as per Fermob's recommendations.
- Any damage arising from insufficient care, or from failure to comply with the supplied instructions and advice for receiving, assembling, using, and maintaining the furniture. Furniture should NOT be stored using plastic or any other material trapping moisture on the product.
- Rings or stains (including stains related to a combination of humidity retention + heat, organic materials such as bird droppings, sap, food or leaves).
- General wear and tear or natural fading of the materials used.
- Chairs and benches should be used for sitting on the seat only. Leaning back on two legs is considered hazardous and damages arising from such are not covered. Tables should be used as designed and not for standing or sitting.
- Corrosion originating from scratches or abrasions that result from general wear and tear and which cannot be removed via standard cleaning and maintenance processes.
- Minor spots of rust under table tops and seats or on bases. This is a natural outcome expected on products made of steel and can be treated using the maintenance tools made available to customers by Fermob. This treatment must be applied promptly to prevent rust from worsening.
- The corrosion of stainless steel parts due to use in a confined, and/or chlorinated environment.
- Corrosion of steel furniture (including stainless steel furniture) as a result of use in a coastal environment.
- Any changes in the visual appearance of wood that are directly linked to aging. As wood is a living material, the appearance of its surface changes naturally over time.
- The natural irregularities in the leather that guarantee its authenticity
- Any changes in the visual appearance of leather that are directly linked to patina and aging. As leather is a living material, the appearance of its surface changes naturally over time.

LIGHTING WARRANTY

Fermob's lighting products are just like its furniture: designed for outdoor use and made from premium-grade materials and components. They are covered by the relevant statutory European warranties, and meet European standards and certifications (such as NF EN 62262).

The lighting warranty specifically excludes :

- lamps that have been modified or tampered with
- lamps repaired using components not supplied by the brand, and without complying with the instructions provided by Fermob.
- lamps that have been not used in the location or use for which they were designed

The same conditions of exclusion apply to developments in wood are the same as to Fermob furniture

ACCESSORIES AND PARASOL WARRANTY

Like its furniture, Fermob accessories (cushions, etc.) and paraols are designed to last, based on a careful selection of materials.

Hence:

- Acrylic textiles and PVC are guaranteed for 2 years against UV degradation, manufacturing defects, mold, and tearing.

THE WARRANTY (**LIGHTING** / **ACCESSORIES** / **PARASOL**) SPECIFICALLY EXCLUDES:

- Accessories or paraols that have been altered, changed, or modified.
- Damage related to a lack of proper care or failure to observe the precautions (e.g. do not open the lamp) and advice for use, maintenance (e.g. close your parasol during inclement weather), and storage provided to the customer.
- Rings or stains not declared when unpacking.
- General wear and tear or natural fading of the materials used.
- Corrosion originating from scratches or abrasion resulting from general wear and tear and which cannot be removed via standard cleaning and maintenance processes.
- Metal components for lights, parasol and accessories are covered by the same guarantee terms and exclusions as items of furniture (see above).

Deterioration caused by failure to observe storage and maintenance instructions is not covered by the warranty.

This warranty begins from the original purchase date and is at the manufacturer's sole discretion. Remedies include replacement, refund or prorated refund determined by length of use and severity of the defect. Any claim must be supported by the purchase receipt and photos.
